

Surveillance Team

Same members as Epi Team plus:

CJ Johnson USDA

Deb Sumpter USDA

Elsa Valdovinos AHB

Lupe Marquez USDA

Tanya Beaucaire USDA

Maura Gibson DVM - USDA

Objectives

- Assemble 50 kits per district to be ready within 12 hours of a positive diagnosis being made.**
- review sampling/pooling protocols**
- Finalize relevant documents with CDFA and USDA input.**
- Develop protocols with CAHFS**

COMPLETED

Potential Zone Maps

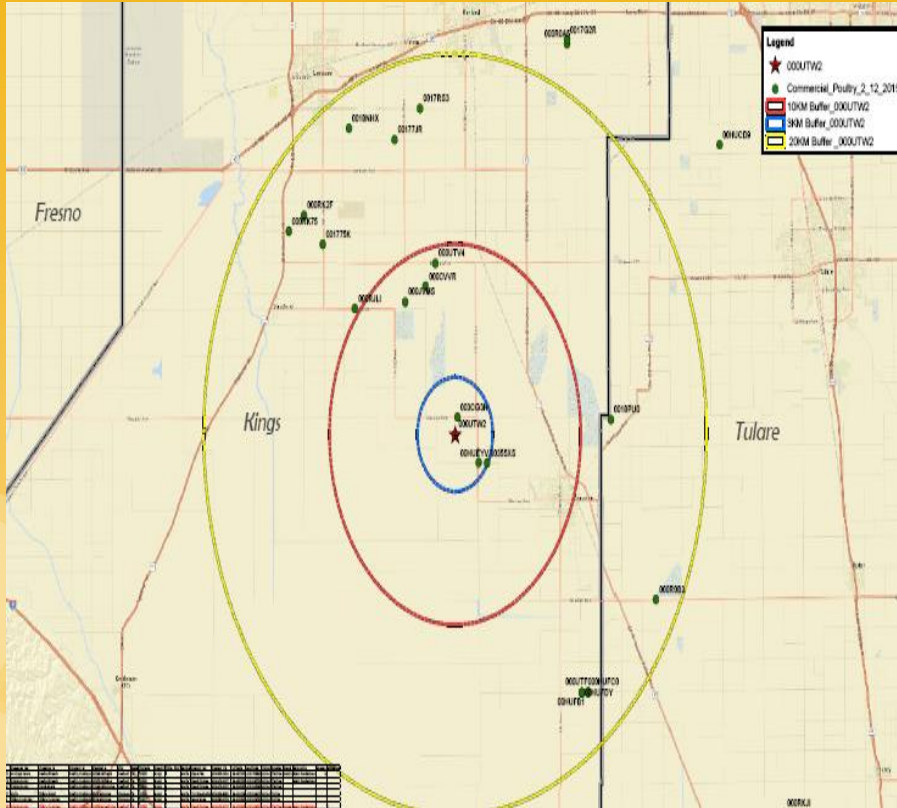

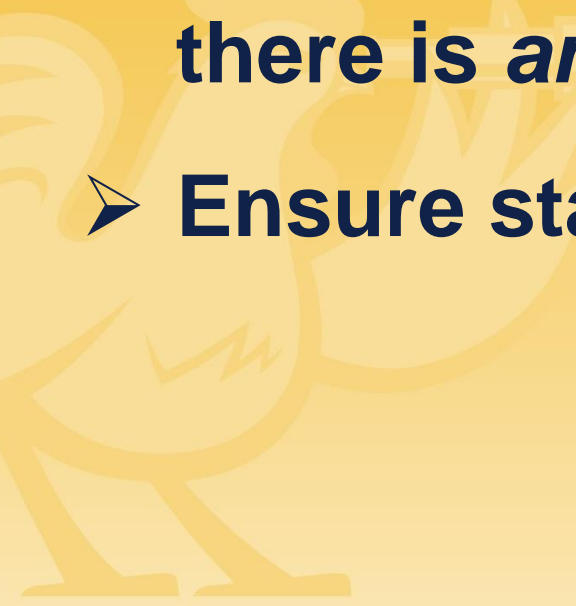

Figure 4-2. Example of Zones and Areas in Relation to Stamping-Out (Infected Premises would be Depopulated)

Assistance from Industry:

- **Sample early in mortality events**
 - **Use weekend CAHFS contact information when necessary**
 - **Move to enhanced biosecurity if there is *any* concern.**
 - **Ensure staff knows how to sample**
- 

Be flexible/Be Patient

There is much happening behind the scenes! There is more to incident management than one premises or one company.

H5N2 Summary

- Many Different Stages to an Event
- Prepare, Prepare, Prepare, Prepare.....
- Engage Industry
- Be Ready for a Tsunami not a Tornado
